Patient Care Technician

Event Category: Health Professions

Eligible Divisions: Secondary & Postsecondary/ Collegiate	**Round One:** 50 Q test (60 minutes)	**Digital Upload:** NO
Solo Event: 1 competitor	**Round Two:** Skill(s) assessment	

New for 2026-2027

Editorial changes have been made. Items competitors must provide has been updated. Laboratory Requisition Form has been updated.

Event Summary

Patient Care Technician allows members to gain the knowledge and skills required for patient care in medical settings. This competitive event consists of two rounds. Round One is a written, multiple-choice test, and the top-scoring competitors advance to Round Two for the skills assessment. This event aims to inspire members to learn more about the field and how to provide quality patient care.

Sponsorship

HOSA-Future Health Professionals appreciates the sponsorship of this event by the National Healthcareer Association. NHA has developed a special landing page for competitors and advisors.	National Healthcareer Association

General Event Information

General Rules	Competitors must be familiar with and adhere to the General Rules and Regulations.
Dress Code	Proper business attire or official HOSA uniform. Bonus points will be awarded for proper dress. ● Round One: Proper business attire, official HOSA uniform, or attire appropriate to the occupational area. ● Round Two: Attire appropriate to the occupational area.
Competitors Must Provide	● Photo ID both rounds ● Two #2 lead pencils (not mechanical) with eraser for the test. ● Neon colored foam earplugs, NOT earbuds, for noise control (Rd1-optional) ● Barrier devices (2 pairs of non-latex gloves, gown, goggles or safety glasses, mask) HOSA Conference Staff will provide equipment and supplies listed in Appendix I.
Official References	The references below are used in the development of the test questions and skill rating sheets: ● National Healthcareer Association PCT SKILLS BUILDER PLUS an online learning resource that provides students with an interactive learning experience focused on the knowledge and skills needed to be a Patient Care Technician.NHA is offering HOSA members a 10% discount on individual purchases and group discounts by contacting an NHA sales representative. Visit the competition landing page HERE. ● National Healthcareer Association Certified Patient Care Technician/Assistant (CPCT/A) Online Study Guide NHA's online study guide helps learners prepare for the Certified Patient Care Technician exam.

The expectation is that competitors read and are aware of all the content within these guidelines and associated links. Successful competitors will study all links for the detailed information.

ROUND ONE- Test

Test Instructions	All competitors will be given a test and answer sheet The written test will consist of 50 multiple-choice items in a maximum of 60 minutes. See test instructions here.
Time Remaining Announcements	There will be NO verbal announcements for time remaining during ILC testing. All ILC testing will be completed in the Testing Center, and competitors are responsible for monitoring their own time.
Written Test Plan	The written test for Patient Care Technician is: ● Patient Care - 44% ● Compliance, Safety, & Professional Responsibility - 20% ● Infection Control - 12% ● Phlebotomy - 14% ● EKG - 10%
Sample Test Questions	1. When applying a splint to an extremity, where would you begin the application according to proximity guidelines? (PCT Skillsbuilder Plus: M9-Mobility and Transfers-Transport Patient via Bed, Stretcher, or Wheelchair) A. Start at the proximal part of the extremity and work towards the distal part. **B. Begin at the distal part of the extremity and work towards the proximal part.** C. Start at the midpoint of the extremity and work outwards. D. Begin at the joint closest to the torso and work towards the fingers or toes. 2. A patient care technician should identify which of the following pieces of personal protective equipment (PPE) should be removed first? (NHA- PCT SkillsBuilder Plus: M4-Patient Safety-Infection Control-PPE) **A. Gloves** B. Face shield C. Mask D. Goggles 3. A patient care technician is performing a 12-lead EKG for a patient. In which of the following locations should the technician place the V4 lead? (NHA - PCT SkillsBuilder Plus; M10-Advanced Clinical Skills-EKG) A. Fourth intercostal space, to the right of the sternum B. Fourth intercostal space, to the left of the sternum C. Left anterior axillary line **D. Fifth intercostal space at the midclavicular line**

ROUND TWO- Skills Assessment

1. The top competitors from Round One will advance to Round Two. The number of advancing competitors will be determined by the scores obtained in Round One and the space and time available for Round Two. Round Two finalists will be announced on-site at ILC per the conference agenda.

2. Round Two is a selected skill(s) performance. The Round Two skills approved for this event are:

Skill I: Discontinue Peripheral IV	**5 minutes**
Skill II: Applying Sequential Compression Devices	**6 minutes**
Skill III: Measuring an Infant's Length & Weight	**7 minutes**
Skill IV: Urinary Catheter Maintenance	**5 minutes**

Skill V: Routine ETS Venipuncture	**10 minutes**
Skill VI: Obtaining a 12-Lead EKG	**10 minutes**
Skill VII: Glucometer	**8 minutes**

3. For all skills, body fluids will be a simulated product.
4. The selected skill(s) will be presented to competitors as a written scenario at the beginning of the round. The scenario will be the same for each competitor. A sample scenario can be found here. Some scenarios may involve the combination of multiple skills. If the event rating sheets are combined, it is not necessary to repeat a task a second time. An example would be competitors would not need to identify the patient twice.
5. Timing will begin when the scenario is presented to the competitors and will be stopped at the end of the time allowed. The scenario is a secret topic. Competitors MAY NOT discuss or reveal the secret topic until after the event has concluded or will face penalties per the GRRs.
6. Competitors must complete all skill steps listed in the guidelines, even if the steps must be simulated/verbalized. (If the equipment is available, the competitors would complete all skill steps as the scenario warrants. The competitors will simulate/verbalize the steps if the equipment is unavailable.)
7. Judges will provide information to competitors as directed by the rating sheets. Competitors may ask questions of the judges while performing skills, if the questions relate to patient's condition and will be included in the scenario or judge script.
8. Competitors must use all equipment correctly and safely. Judges will stop a student and not award points for a step if they see a competitor is about to cause a risk of harm or about to damage equipment or other supplies.

Final Scoring

1. The competitor must earn a score of 70% or higher on the combined skill(s) in Round Two-Skills Assessment in order to be recognized as an award winner at the ILC.

2. The final rank is determined by adding the round one test score plus the round two skill score. In the event of a tie, the highest test score will be used to determine the final placement.

Future Opportunities

The HOSA Scholarship program has funding available for HOSA members who have an interest in various health careers! The application process begins January 1, 2027, and can be found here: https://hosa.org/scholarships/.

Graduating from high school or completing your postsecondary/collegiate program does not mean your HOSA journey has to end. As a HOSA member, you are eligible to become a HOSA Lifetime Alumni Member- a free and valuable opportunity to remain connected, give back, and help to shape the future of the organization. Learn more and sign up at hosa.org/alumni.

Patient Care Technician

Skill I: Discontinue Peripheral Intravenous Site

Time: 5 minutes

Competitor #:_____ **Division:** _____SS _____PS/C **Judge's Signature:**_____

	Skill I: Discontinue Peripheral Intravenous Site	Possible	Awarded
1.	Verified physician's orders and reviewed scenario for any bleeding issues.	2 0	
2.	Obtained needed equipment and supplies.	1 0	
3.	Washed hands or used alcohol-based handrub for hand hygiene.	2 0	
4.	Put on gloves.	2 0	
5.	Identified patient by checking ID bracelet and asking the patient to state their name and birthdate.	2 0	
6.	Identified self and explained skill to patient.	2 0	
7.	Provided privacy.	2 0	
8.	Removing dressing: a. Removed overlying tape.	1 0	
	b. Removed transparent membrane dressing by picking up one corner and pulling the side laterally while holding the catheter hub.	2 0	
	c. Repeated pulling dressing from the other side laterally while holding catheter hub.	2 0	
	d. Alternatively, remove gauze dressing and tape one layer at a time.	2 0	
	e. Tape securing catheter to skin left intact.	2 0	
9.	Turned IV tubing roller clamp to "off" position and removed tape securing tubing.	2 0	
10.	Removed IV dressing and tape while stabilizing catheter.	2 0	
11.	Held dry gauze over site.	1 0	
12.	Applied light pressure and withdrew the catheter using a slow steady movement.	2 0	
13.	The hub remained parallel to the skin while removing.	2 0	
14.	Using the dry, sterile gauze, applied pressure to the site for 2 to 3 minutes.	2 0	
15.	Secured tape snugly over the gauze.	1 0	
16.	Inspected the catheter for intactness, noting tip integrity and length.	2 0	
17.	Discarded used supplies.	1 0	
18.	Removed gloves and washed hands or used alcohol-based handrub for hand hygiene.	2 0	
19.	Instructed patient to report any erythema, pain, drainage, or edema that occurs after catheter removal	2 0	
20.	Document the following:: a. Time peripheral IV infusion was discontinued.	2 0	

The expectation is that competitors read and are aware of all the content within these guidelines and associated links. Successful competitors will study all links for the detailed information.

Skill I: Continued...		Possible	Awarded
	b. Condition of site.	2 0	
	c. Gauge and length of catheter.	2 0	
21.	Used appropriate verbal and nonverbal communication with patient and other personnel.	2 0	
22.	Practiced standard precautions throughout skill.	2 0	
	Total Points- Skill I: 70% Mastery for Skill I: 35.7	**51**	

The expectation is that competitors read and are aware of all the content within these guidelines and associated links. Successful competitors will study all links for the detailed information.

Patient Care Technician

Skill II: Applying Sequential Compression Devices

Time: 6 minutes

Competitor #:_____ **Division:** _____SS _____PS/C **Judge's Signature:**_____

	Skill II: Applying Sequential Compression Devices	Possible	Awarded
1.	Assembled equipment and supplies.	1 0	
2.	Washed hands or used alcohol based hand-rub for hand hygiene.	2 0	
3.	Identified patient by checking ID bracelet and asking patient to state their name and birthdate.	2 0	
4.	Identified self and explained the procedure to the patient.	2 0	
5.	Provided privacy.	2 0	
6.	Arranged sequential compression device (SCD) sleeve under patient's leg according to leg position indicated on the inner lining of sleeve. a. Back of patient's ankle should line up with ankle on inner lining of sleeve.	2 0	
	b. Positioned back of knee with popliteal opening.	2 0	
7.	Wrapped SCD sleeve securely around patient's leg.	2 0	
8.	Verified fit of SCD sleeves by placing two fingers between patient's legs and sleeves.	2 0	
9.	Attached connector of SCD sleeve to plug on mechanical unit using arrow on plug.	1 0	
10.	Turned unit on and verified is functioning.	1 0	
11.	Observed the functioning of the unit for one full cycle.	1 0	
12.	Repositioned patient for comfort.	1 0	
13.	Washed hands or used alcohol based hand-rub for hand hygiene.	1 0	
14.	Documented in nursing notes.	2 0	
15.	Used appropriate verbal and nonverbal communication with patient.	2 0	
16.	Practiced standard precautions throughout skill.	2 0	
	Total Points- Skill II: 70% Mastery for Skill II: 19.6	**28**	

The expectation is that competitors read and are aware of all the content within these guidelines and associated links. Successful competitors will study all links for the detailed information.

Patient Care Technician

Skill III: Measuring an Infant's Length & Weight

Time: 7 minutes

Competitor #:_____ **Division:** _____SS _____PS/C **Judge's Signature:**_____

	Skill III: Measuring an Infant's Length & Weight	Possible	Awarded
1.	Assembled equipment and supplies.	1 0	
2.	Washed hands or used alcohol based hand-rub for hand hygiene.	2 0	
3.	Identified patient by checking ID bracelet and asking patient/caregiver to state their name and birthdate.	2 0	
4.	Identified self and explained skill to the infant's caregiver.	2 0	
5.	Prepared the scale by lining it with disposable paper.	2 0	
6.	Provided privacy.	2 0	
7.	Asked the caregiver to place the infant on their back on the examination paper.	1 0	
8.	Undressed infant - diaper may be left on for length measurement.	1 0	
9.	Asked the caregiver to hold their head still gently.	1 0	
10.	Straightened one leg.	1 0	
11.	Marked on examination paper at the top of the infant's head and at the heel after the leg is extended.	1 0	
12.	Measured the length between marks on exam paper with a tape measure and recorded.	2 0	
13.	Removed diaper.	1 0	
14.	Placed the infant gently on the scale keeping hand above the infant's trunk for safety.	2 0	
15.	Recorded weight.	2 0	
16.	Washed hands or used alcohol based hand-rub for hand hygiene.	2 0	
17	Recorded length and weight on the Nurses Notes.	2 0	
18.	Completed growth chart for both height and weight by connecting dots from last visit.	2 0	
19.	Used appropriate verbal and nonverbal communication with patient.	2 0	
20.	Practiced standard precautions throughout skill.	2 0	
	Total Points- Skill III: 70% Mastery for Skill III: 23.1	**33**

Patient Care Technician

Skill IV: Urinary Catheter Maintenance

Time: 5 minutes

Competitor #:_____ **Division:** _____SS _____PS/C **Judge's Signature:**_____

**The scenario will include the gender of the patient requiring urinary catheter maintenance.*

	Skill IV: Urinary Catheter Maintenance	Possible		Awarded
1.	Assembled equipment and supplies.	**1**	**0**	
2.	Washed hands or used alcohol-based handrub for hand hygiene.	**2**	**0**	
3.	Approached, greeted the patient, and identified self.	**1**	**0**	
4.	Identified patient by checking ID bracelet and asking patient to state their name and birthdate.	**2**	**0**	
5.	Explained the procedure and obtained consent.	**2**	**0**	
6.	Provided privacy.	**2**	**0**	
7.	Applied gloves.	**2**	**0**	
8.	POSITIONED PATIENT: **FEMALE:** Dorsal recumbent position, OR **MALE:** Supine with legs extended and thighs slightly abducted	**2**	**0**	
9.	Placed a waterproof pad under the patient.	**1**	**0**	
10.	Performed perineal care using soap and water with a washcloth, or other cleansing agent specified by facility. (scenario)	**2**	**0**	
11.	Cleaned catheter tubing moving away from the body.	**2**	**0**	
12.	Evaluate, observe and verbalize (to judge) any changes or discomfort including: discharge, length of time catheter has been in place, inflammation, edema, changes in tissue color, burning.	**2**	**0**	
13.	Secure catheter to patient's leg and collection device to bed of frame below the patient's bladder.	**2**	**0**	
14.	Removed gloves.	**1**	**0**	
15.	Washed hands or used alcohol-based handrub for hand hygiene.	**2**	**0**	
16.	Used appropriate verbal and nonverbal communication with patient and other personnel.	**2**	**0**	
17.	Practiced standard precautions throughout skill.	**2**	**0**	
	TOTAL POINTS -- SKILL IV 70% Mastery for Skill IV = 21	**30**		

The expectation is that competitors read and are aware of all the content within these guidelines and associated links. Successful competitors will study all links for the detailed information.

Patient Care Technician

Skill V: Routine ETS Venipuncture

Time: 10 minutes

Competitor #:_____ **Division:** _____SS _____PS/C **Judge's Signature:**_____

	Skill V: Routine ETS Venipuncture	Possible	Awarded
1.	Reviewed test request/requisition (via the competition scenario).	2 0	
2.	Assembled equipment and supplies.	1 0	
3.	Approached, greeted the patient, and identified self.	2 0	
4.	Identified patient by checking ID bracelet and asking the patient to state their name and birthdate.	2 0	
5.	Verbally matched the patient identification to the requisition.	2 0	
6.	Explained the procedure and obtained consent.	2 0	
7.	Sanitized hands and put on gloves.	2 0	
8.	Attached the needle firmly to the Vacutainer holder with cover still on the needle.	2 0	
9.	Applied tourniquet 3 to 4 inches above the venipuncture, feeling slightly tight but not cutting off blood flow in the artery.	2 0	
10.	Asked the patient to make a fist.	1 0	
11.	Selected the vein in the antecubital area by palpating with the tip of the index finger to trace the path of the vein and judge the depth.	1 0	
12.	Released tourniquet, and asked patient to open the fist.	1 0	
13.	Cleaned selected puncture site with a 70% isopropyl alcohol or antiseptic wipe using a circle motion starting at the center and working outward in a circular pattern.	2 0	
14.	Allowed the site to air dry for up to 60 seconds before proceeding.	1 0	
15.	Reapplied the tourniquet and asked the patient to make a fist.	1 0	
16.	Held the Vacutainer assembly in dominant hand with thumb on top and fingers underneath.	1 0	
17.	Placed first tube in vacutainer without pushing into the double-pointed needle.	1 0	
18.	Removed the needle sheath.	1 0	
19.	Used the thumb on the nondominant hand to anchor the vein by stretching the skin downward below the puncture site.	1 0	
20.	With bevel up, aligned parallel to vein and inserted needle at a 15 to 30 degree angle into the vein in quick smooth motion.	1 0	
21.	Placed two fingers on the flanges of the needle holder, and used thumb to engage the tube with the double-pointed needle.	1 0	
22.	Ensured the needle did not change positions in the vein.	1 0	
23.	When blood began to flow, directed the patient to release their fist.	1 0	

The expectation is that competitors read and are aware of all the content within these guidelines and associated links. Successful competitors will study all links for the detailed information.

Skill V: Continued...		Possible	Awarded
24.	Allowed tube to fill to maximum capacity	1 0	
25.	Removed the tube by curling the fingers underneath and pushing on the needle holder with the thumb while taking care not to move needle in the vein.	1 0	
26.	Repeated steps above for filling remaining tubes.	1 0	
27.	Gently inverted tubes after removing to mix anticoagulants and blood.	1 0	
28.	As the last tube is filling, release the tourniquet.	1 0	
29.	When the last tube has filled, remove the tube from the needle.	1 0	
30.	Removed the last tube from the holder.	1 0	
31.	Placed gauze over the puncture site.	1 0	
32.	Quickly removed needle and engaged safety device.	2 0	
33.	Disposed of the entire unit in a sharps container.	2 0	
34.	Instructed patient to maintain pressure on venipuncture site until bleeding stops and to not bend the elbow.	2 0	
35.	Labeled and prepared tubes for handling and transport before leaving patient.	1 0	
36.	Checked the puncture site for bleeding and hematoma formation.	2 0	
37.	Applied a hypoallergenic bandage.	1 0	
38.	Disinfected work area.	2 0	
39.	Disposed of used materials.	2 0	
40.	Removed and disposed of gloves.	2 0	
41.	Washed hands or used alcohol-based handrub for hand hygiene.	2 0	
42.	Completed requisition and documented in the patient's chart.	2 0	
43.	Verbalized specimen would be routed to appropriate place.	2 0	
44.	Used appropriate verbal and nonverbal communication with patient and other personnel.	2 0	
45.	Tourniquet did not remain on arm for greater than 120 seconds during site selection.	2 0	
46.	Practiced standard precautions throughout skill.	2 0	
	TOTAL POINTS – SKILL V 70% Mastery for Skill V = 47.6	**68**	

The expectation is that competitors read and are aware of all the content within these guidelines and associated links. Successful competitors will study all links for the detailed information.

Skill VI: Obtaining a 12-Lead EKG

Time: 10 minutes

Competitor #:_____ **Division:** _____SS _____PS/C **Judge's Signature:**_____

Skill VI: Obtaining a 12-Lead EKG		**Possible**	**Awarded**
1.	Reviewed test request (scenario)	**2 0**	
2.	Approached, greeted the patient, and identified self.	**2 0**	
3.	Provided patient with privacy.	**2 0**	
4.	Washed hands or used alcohol-based handrub for hand hygiene.	**2 0**	
5.	Identified patient by checking ID bracelet and asking patient to state their name and birthdate.	**2 0**	
6.	Explained the procedure and obtained consent.	**2 0**	
7.	Assisted the patient into a supine position.	**1 0**	
8.	Placed the EKG machine beside the bed and plugged into an electrical outlet.	**1 0**	
9.	Turned the machine on and waited until self-test is completed.	**1 0**	
10.	Entered the patient's information into the machine (name, date of birth) or scanned barcode bracelet (made sure the correct patient information is displaying).	**1 0**	
11.	Verbalized prepared patient's skin by removing lotion or clipping if needed.	**1 0**	
12.	Opened the package of electrodes and attached one electrode to each lead wire by snapping or clipping.	**1 0**	
13.	Attached the electrodes in the correct positions avoiding bony areas, broken skin, scar tissue, and skin over implanted devices a. V1 – Right side of sternum @ fourth intercostal space	**2 0**	
	b. V2 - Left side of sternum @ fourth intercostal space	**2 0**	
	c. V4 - Left side of chest, fifth intercostal space at the left midclavicular line.	**2 0**	
	d. V3 - Left side of chest, midway between V2 & V4	**2 0**	
	e. V5 – Horizontally even with V4 in the left anterior axillary line	**2 0**	
	f. V6 - Left side of chest, fifth intercostal space, midaxillary line	**2 0**	
	g. Extremity Lead: LA	**2 0**	
	h. Extremity Lead: LL	**2 0**	
	i. Extremity Lead: RA	**2 0**	
	j. Extremity Lead: RL	**2 0**	
14.	Asked the patient to relax and be as still as possible, while breathing normally.	**1 0**	
15.	When the tracing was clear or when machine shows green light, printed the EKG recording.	**1 0**	
	***Judge states, "The EKG is ready to be used."**		
16.	Disconnected lead wires, taking care not to pull patient's skin.	**1 0**	

The expectation is that competitors read and are aware of all the content within these guidelines and associated links. Successful competitors will study all links for the detailed information.

Skill VI: Continued...		Possible	Awarded
17.	Asked patient to remove and dispose of electrodes.	1 0	
18.	Washed hands or used alcohol-based handrub for hand hygiene.	2 0	
19.	Verbalized would inform unit staff that EKG is completed.	1 0	
20.	Verbalized uploaded or included file in patients' medical record.	2 0	
21.	Documented the procedure.	2 0	
22.	Verbalized followed policy regarding reporting abnormalities.	1 0	
23.	Verbalized would clean and store EKG machine according to facility policy.	2 0	
24.	Washed hands or used alcohol-based handrub for hand hygiene.	2 0	
25.	Used appropriate verbal and nonverbal communication with patient and other personnel.	2 0	
26.	During the entire procedure maintained privacy by only exposing areas as necessary to prepare the skin or conduct the test.	2 0	
27.	Practiced standard precautions throughout skill.	2 0	
	TOTAL POINTS -- SKILL VI 70% Mastery for Skill VI = 42	60	

The expectation is that competitors read and are aware of all the content within these guidelines and associated links. Successful competitors will study all links for the detailed information.

Patient Care Technician

Skill VII: Glucometer

Time: 8 minutes

Competitor #:_____ **Division:** _____SS _____PS/C **Judge's Signature:**_____

	Skill VII: Glucometer	Possible	Awarded
1.	Reviewed test request/requisition (via the competition scenario).	2 0	
2.	Assembled equipment and supplies.	1 0	
3.	Washed hands or used alcohol-based handrub for hand hygiene.	2 0	
4.	Approached, greeted patient, and identified self.	2 0	
5.	Identified patient by checking ID bracelet and asking the patient to state their name and birthdate.	2 0	
6.	Verbally matched the patient identification to the requisition.	2 0	
7.	Explained the procedure and obtained consent.	2 0	
8.	Put on gloves.	2 0	
9.	Prepared glucose monitor, confirmed patient ID.	2 0	
10.	Selected, prepared, and cleansed site.	2 0	
11.	Performed capillary puncture, wiping away first drop of simulated blood.	2 0	
12.	Placed a second drop of simulated blood on the test strip.	2 0	
13.	Applied new gauze to patient's finger.	1 0	
14.	Read results and turn off the monitor.	2 0	
15.	Cleaned monitor and disposed of supplies.	2 0	
16.	Removed gloves and washed hands or used alcohol-based handrub for hand hygiene.	2 0	
17.	Completed environmental and patient safety checks. a. Call bell within reach	1 0	
	b. Patient position	1 0	
	c. Patient belongings within reach	1 0	
	d. Offered patient elimination	1 0	
	e. Patient pain	1 0	
18.	Reinforced patient education and documented in patient chart.	2 0	
19.	Washed hands or used alcohol-based handrub for hand hygiene.	2 0	
20.	Used appropriate verbal and nonverbal communication with patient and other personnel.	2 0	

The expectation is that competitors read and are aware of all the content within these guidelines and associated links. Successful competitors will study all links for the detailed information.

Skill VII: Continued...		Possible	Awarded
21.	Documented findings in the Nurses Notes.	2 0	
22..	Communicated findings to the nurse (judge).	2 0	
	TOTAL POINTS -- SKILL VII 70% Mastery for Skill VII =31.5	**45**	

The expectation is that competitors read and are aware of all the content within these guidelines and associated links. Successful competitors will study all links for the detailed information.
